Circle Interchange: Critical Improvements to a Vital Junction
The I-90/94 at I-290 Circle Interchange, also known as the Jane Byrne Interchange, is a major freeway interchange in the heart of downtown Chicago. It’s a critical connection for the Dan Ryan Expressway (I-90/94), the Kennedy Expressway (I-90/94), the Eisenhower Expressway (I-290), and Congress Parkway.

According to the Federal Highway Administration (FHWA), the Jane Byrne Interchange is the slowest and most congested highway freight bottleneck in the nation. More than 400,000 vehicles travel through the interchange daily, and on average, more than 1,100 crashes are reported per year. It’s a notorious traffic jam, and according to the US Department of Transportation, it accounts for approximately 25 million lost hours each year.

Bender Joins ACEC as Engineers Double Down on Advocacy
Washington, DC – Doubling down on its recent wins in tax reform, the American Council of Engineering Companies (ACEC) – the business association of the nation’s engineering industry – recently announced the hire of veteran lobbyist and association leader Dave Bender to its DC advocacy team. Bender, who most recently served as President of ACEC-IL (the federation’s Illinois branch,) has been brought on as the organization works to leverage the strength of its growing PAC and experienced policy shop in support of their 5,600 member engineering firms.

According to ACEC President & CEO, Linda Bauer Darr, engineers face a dynamic policy environment, which includes both the threats of commoditization of their profession, challenges to licensure standards, and qualifications-based selection (versus price selection) as well as significant opportunities to press for greater infrastructure investment and private market growth.

During consideration of the Tax Cuts and Jobs Act, ACEC pulled out a last-minute win with passage of language that secured access to the new 20 percent tax deduction for passthrough firms, which represent the majority of ACEC’s membership. This victory saved engineering firms millions and raised the profile of the 100+ year old organization.

“Dave is a known quantity in our industry. He’s part of the ACEC family with a track record of success in Illinois,” said ACEC Chair, Manish Kothari. “Dave served the state of Illinois in cabinet agencies and in the Governor’s office for years and has 20 years of association management experience, so he understands our

Springfield, Ill. (April 24, 2019)

UPCOMING EVENTS

Monday, May 13, 2019 9am-3pm
The Need for Sustainable Funding

Elected officials are the ones that determine funding levels for all public infrastructure. Yet we seem to not understand who they are, what they do, how they do it and why it is so important to be engaged in the legislative process.

Learn about the political and governmental process, from the local city council, the state General Assembly and Congress. You will gain the knowledge on how to be an effective citizen lobbyist and why this is important to your firm — and your career.

*Eligible for 6 PDH’s

Presented by: Dave Bender, ACEC Illinois President/CEO
WEBINAR SUGGESTIONS:
ACEC-IL is proud to announce we have expanded our educational outreach to include Webinars.

This affords our membership greater flexibility in participation of sessions which aim at enhancing business productivity. If there is a topic that you would like to see presented, please contact us at bethany@acecil.org
